Automate your parcel management process.

Bedal is a multi-function shipping platform that enables you to save time and money.

parcelkiosk™

parcelkiosk.com

Automating parcel measurements improves performance and saves resources.

Bedal is a cost-effective solution for parcel weight and dimensioning.

Designed to integrate with a range of warehouse applications and carrier shipping solutions, Bedal delivers positive results from the beginning.

Reliable and accurate.

With a Bedal in your warehouse, you can be assured that accurate weight and dimensions are being calculated and your business is protected from error and potential surcharges. Every data log captured comes with a date and time stamp, giving you complete traceability.

Bedal comes with its very own utility software called Bedal Connect. This enables easy integration into a range of applications using industry recognised formats. Bedal Connect also enables you to capture product images using its integrated camera.

Bedal is amongst the few dimensional and weight platforms that is legal for trade.

Bedal 3S Weight and Dimension platform is approved to legal standards and carries International Organization of Legal Metrology (OIML) approved certification.
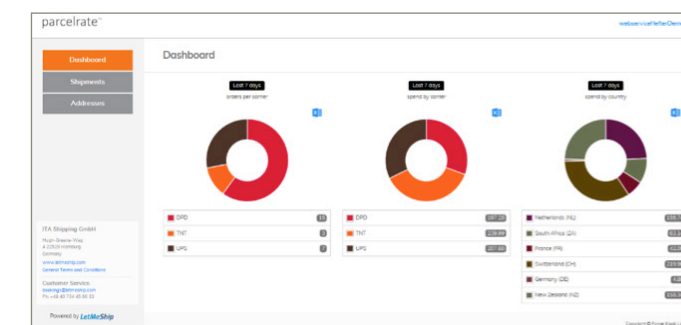

Bedal can be deployed for use in various environments and market segments. Upgrade Bedal with optional enhancements, such as a mobile workstation for pick and ship applications, Optical Character Recognition (OCR) for handwritten text reading, Barcode reader for scanning, etc.

These additions further increase the usability of Bedal as an effective tool for warehouse management or on a retail counter.

Real time carrier connectivity.

Connect Bedal with Parcelrate for direct access to a network of established carrier service providers.

Our global booking tool simplifies your shipping process with live carrier rates, label creation, carrier collection, track and trace & spend analysis together in one place.

Your complete shipping solution.

Bedal and Parcelrate present a complete shipping solution for businesses of all sizes. Benefits of this consolidated solution can be experienced from the very first package.

Easy to use. Simple workflow from weight capture to label generation.

No subscriptions. No software licence or subscription lock down.

ROI driven purchase. Hardware pays for itself through operational savings.

Accurate dimensions. Volumetric accuracy contributes to shipment related savings.

Rate compare. Compare rates from different services selected by price or speed.

Multiple log-in. Access shipping platform from multiple locations.

Parcel data. Use captured parcel data for warehouse, consolidation and fleet management.

Reduce waste. Reduced packaging and use of actual box size helps reduce carbon footprint.
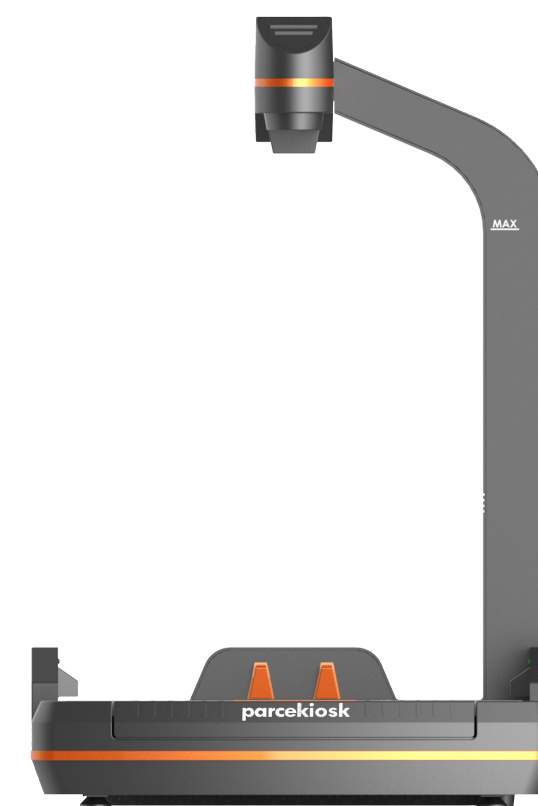

Process parcels faster. Increase efficiency by processing parcels x3 faster.

Notifications. Get shipping notifications from one location.

Reports. Export shipping reports and access dashboards.
